Left Wing Lock, Inc. Releases Version 2.0.2 of iPhone App

CHEVY CHASE, MD. - February 03, 2014 - Left Wing Lock, Inc., the leading provider of fantasy hockey lineup data, announced today that an updated version of the iPhone App will be available to users for immediate download.

This latest update brings the full functionality of the line combination tool from the website to each user's iPhone. "Moving from the three most recent games' data to full functionality is a huge boost for our App," said site co-owner Patrick McLaughlin.

Mike McLaughlin, co-owner of the site and lead developer, noted "our iPhone App offerings continue to grow making it a viable alternative to using the website entirely. For an end user to have complete line combination information for all 30 NHL teams in the palm of their hand is empowering."

The iPhone App can be downloaded from the url below:
